ADDRESS CORRECTION REQUESTED **RUSH — TIME DATED**

(Newsbriefs continued)

A two-day seminar on ergonomics—the science of designing equipment and environments to optimally match one's needs—will be held at UC Extension on Thursday and Friday, March 8 and 9.

Sponsored by the Northern California Occupational Health Center and UC-San Francisco, Berkeley and Davis, the seminar is an introductory overview of industrial ergonomics and is designed for physicians, nurses, industrial hygienists, safety engineers and health educators.

Information will be given on stress problems, workplace design and biomechanical problems. Video display terminals, repetitive motion trauma and heat stress also will be discussed.

For further information call 642-5507.

The first West Coast Conference for Jewish Medical Ethics will be held in San Francisco on Monday and Tuesday, March 5 and 6.

The scholar in residence will be Sir Immanuel Jakobovitz, Chief Rabbi of the British Commonwealth, who will speak at UCSF on Tuesday at noon in HSW 302 on the subject of the termination of life, including withdrawing life support, removing vital organs for transplants, and hazardous experimentation.

On Monday at Mount Zion, he will discuss doctor-patient relationships, abortion, *in vitro* fertilization and genetic engineering.

As part of the Monday program, a panel of Bay Area physicians, including UCSF faculty Noel Fishman, Kent Gershengorn and Richard Cohen, will discuss "Medical Ethics: Influence on Daily Practice."

The conference is sponsored by the Institute for Jewish Medical Ethics. For further information call 752-7333

DEADLINE

Deadline for the next issue of *Today & Tomorrow,* covering the time period Mar. 10-23, will be **Tuesday, Feb. 28, 11 a.m.** Please send your copy to Allen Balderson, News & Public Information Services, 532 Parnassus Ave., Rm. 300, x1541 or x2557.

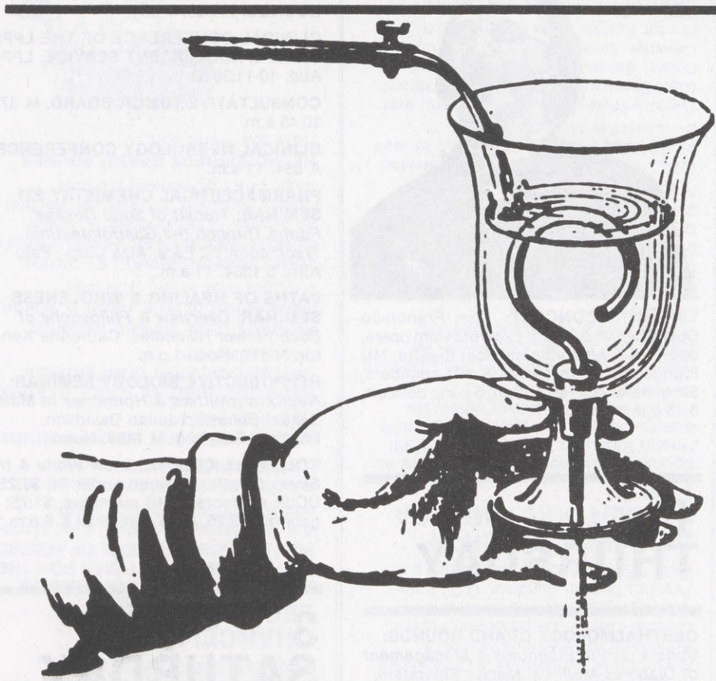
Vol. 10 No. 5, Feb. 25-Mar. 9, 1984

UCSF researchers working on this campus and at Mount Zion Hospital have

The Women, Health and Healing Project is compiling a roster of UCSF research-

FEB. 25-MAR. 9, 1984

TODAY & TOMORROW



On the Third Annual Founders Day on Saturday, March 25, UCSF will proudly acknowledge research in the dental, medical, nursing, pharmaceutical, basic biomedical and behavioral sciences.

Highlighting the day's events will be two major talks in Cole Hall at 1:30 p.m.: "Advancement of Knowledge: The Cornerstone of a University," by UC President David P. Gardner, and "UCSF's Distinction in Research—What It Means to People," by Chancellor Krevans.

The schools of Pharmacy, Dentistry and Nursing will hold alumni breakfasts, and the School of Medicine will give a morning scientific presentation from 10 to 11 a.m. in HSW 302, to which everyone is invited:

- "Magnetic Resonance (NMR): Unlocking Secrets of the Body." Charles A. Gooding, MD, professor, radiology and pediatrics;
- "Nutrition Research: Facts and Fancy." Marion Nestle, PhD, associate dean, School of Medicine, and director, Human Biology Program;
- "*In Vitro* Fertilization: How Does It Work?" Robert H. Glass, MD, professor, Ob/Gyn.

A portrait of the late Willard C. Fleming, former UCSF chancellor and former dean of the School of Dentistry, will be unveiled in the Medical Sciences lobby at 11:45 a.m., followed by a picnic lunch in the Millberry Union gym. For lunch tickets at $7 each call x2401.

The evening before Founders Day, a kick-off celebration will be held from 4 to 6:30 p.m. in the Millberry Union gym, where students, faculty and staff can kick up their heels and party.

The Board of Education's Committee on Buildings, Grounds and Services has sent back to staff for further clarification a proposed agreement between the San Francisco Unified School District (SFUSD) and the University of California for an option to UC to lease the abandoned Polytechnic High School site for housing.

The original agreement, which requires approval by both the SF Board of Education and the UC Regents, was for UC to pay $2.8 million for a 75-year lease, with an option to purchase for an additional $1 million.

At its February 7 meeting, the SF Board of Education Committee indicated it would not agree to sell the 3.2 acre site, which is located between Carl and Frederick Streets immediately adjacent to the northeast corner of the UCSF campus. Also, it asked that the School District staff reaffirm the value of the property.

Asked whether the University would consider going forward with the Polytechnic housing plan without the option to purchase, representatives told the Board that the University would consider "any reasonable offer."

The UCSF preliminary plans for the site were to replace all of the 72-year-old buildings with a housing development of from 230 to 270 units with landscaped open space, underground parking, and recreational facilities to be used jointly by campus and neighborhood. The buildings would be designed with a 40-foot or less height limit, stepped down from Carl Street to Frederick Street.

The underground parking would provide one space for each unit, plus an additional 300 spaces which would help to relieve parking and traffic congestion in the area. In addition, some of the garage would be available nights and weekends for off-street parking for cars of neighbors and their visitors.

Under the proposed plan, the actual recreation programs would be based on results of a survey of campus students, staff and faculty due to be completed within a month. In the meantime,

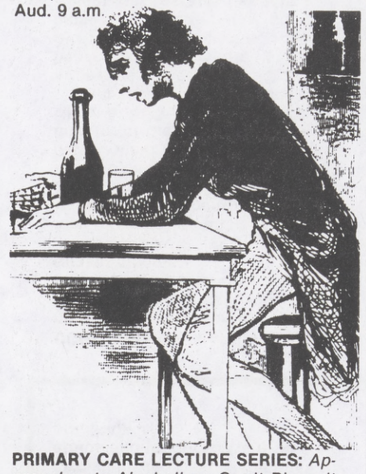
ENDOCRINE GRAND ROUNDS: *Ionic Determinants in the Pathogenesis of Hypertension.* R. Curtis Morris, Med. & Ped.; Theodore Kurtz, Lab. Med. LPPI Aud. 9 a.m.



PRIMARY CARE LECTURE SERIES: *Approaches to Alcoholism.* Gerrit Blauvelt, Psychr.; Samuel McFadden, Med. A 455. 10 a.m.-noon.

MEDICINE GRAND ROUNDS: *CRF, Peptide of Champions: Was Vonnegut Right?* Wylie Vale, Salk Inst., San Diego. *Risks & Prevention of Hepatitis B in Health Workers.* Jules L. Dienstag, Med., Harvard. Cole Hall. 10:30 a.m.-noon.

ORAL BIOLOGY 209 CONNECTIVE TISSUE SEMINAR: *Elastomeric Polypeptide Biomaterials: New Concepts & Directions.* Dan W. Urry, Biochem., U Alabama, Birmingham. HSE 317. 11 a.m.-noon.

PSYCHIATRY GRAND ROUNDS: *Infant-Parent Psychotherapy with an Autistic Toddler.* Judith Pekarsky & Barbara Kalmanson, Infant-Parent Prog. HSW 301. 11 a.m.-12:30 p.m.

FACULTY WIVES MEETING. Tour of UCSC, and Chancellor Robert Sinsheimer to speak. University House, UCSC. 11:30 a.m. For information contact Mrs. David Allen, 388-2883.

BROWN BAG TOURS LECTURE SERIES: *Quackery & the Arthritis Patient.* Kenneth F. Fye, Med. Tapes of all talks available for listening in HSE 345, SIMA Unit, UCSF Library. For further information call x4394. HSW 303. Noon. Free.*

ANATOMY SEMINAR: *Cell Traction: A New Morphogenetic Mechanism.* David Stopack, Biol., Stanford. HSE 1309. Noon.

PHYSIOLOGY SEMINAR: *Lung Surfactant.* Jon Goerke, Physiol. & CVRI. S 758. 1 p.m.

ENDOCRINOLOGY SEMINAR: *Calcium &*

PRIMARY CARE GRAND ROUNDS: *Seronegative Arthritides.* Paul A. Feigenbaum, Med. A 455. 4:30 p.m.

JOINT UCSF/UC-BERKELEY BIOENGINEERING SEMINAR: *The Saccadic Eye Movement System: Models, Data & Physiology.* E.L. Keller, Elec. Engr. & Computer Sci., UC-Berkeley. N 721. 5 p.m.

RADIATION ONCOLOGY GRAND ROUNDS: *Magnetic Resonance Imaging of the Body.* Charles B. Higgins, Radiol. L 75. 5 p.m.

NEUROSURGERY GRAND ROUNDS. HSW 302. 5-6:30 p.m.

RADIOLOGY GRAND ROUNDS: *Experience with MRI at the University of Pennsylvania.* Herbert Kressel, Nuclear Magnetic Resonance, U Pennsylvania. HSW 303. 5:30-6:30 p.m.

9 FRIDAY

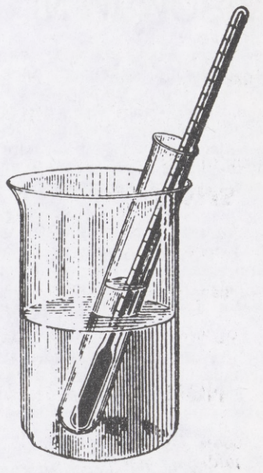
PULMONARY PHYSIOLOGY SEMINAR: *UC Case Presentations.* L 1361. 8:10-9:30 a.m.

PEDIATRICS CHIEF OF SERVICE ROUNDS. M 666. 9 a.m.

PHARMACOLOGY SEMINAR: *Islet-Activating Protein, Pertussis Toxin, as a Promising Probe for the Signal Transduction Mechanism.* Michio Ui, Physiol. Chem. & Pharm. Sci., Hokkaido U, Japan. S 664. 9 a.m.

CLINICAL CONFERENCE OF THE LPPI CHILD & ADOLESCENT SERVICE. LPPI Aud. 10-11:30 a.m.

CONSULTATIVE TUMOR BOARD. M 372. 10:45 a.m.



PHARMACEUTICAL CHEMISTRY 221 SEMINAR: *The Receptor as a Processing Unit.* Dan Koshland, Biochem., UC-Berkeley. S 1364. 11 a.m.

CLINICAL NEUROLOGY CONFERENCE. A 884. 11 a.m.

REPRODUCTIVE BIOLOGY SEMINAR: *Dephosphorylation & the Mechanism of Action of Mullerian-inhibiting Substance.* Patricia K. Donahoe, Ped. Surg., Mass.

NEWS BRIEFS

(Poly High continued)

Associate Administrative Vice Chancellor Tom Rolinson and Assistant Chancellor Tom Gwyn plan a third and fourth round of meetings with neighborhood groups to get their input. The amount of recreational space, and the type of programs, will depend on economic feasibility as well as desirability, they emphasized.

Thefts of micro and minicomputers, including software, are being reported more and more frequently from businesses and public institutions.

The UCSF Police Department recommends the following measures to minimize the risk of losing your campus computer:

- engrave UC property numbers and/or California driver's license numbers on each computer,
- keep a record of serial numbers, brand names and descriptions of each computer in a locked area,
- restrict access to areas that contain computers,
- if door keys are lost or stolen, notify your immediate supervisor and the UCSF Police Department immediately,
- locks on entrance doors to areas that contain computers should be changed every three to five years,
- bolt down all computers with bolts or anchor pads.

The Police Department also suggests that some campus departments might consider using "pressure sensitive" devices to help secure their most expensive computers. For further information contact crime prevention officer Joseph Lambert at x1414.

One of the many ethical issues facing the health professions today, especially nurses, is the allocation of scarce resources and how it interferes with patient care.

The Department of Mental Health and Community Nursing is presenting a one-day course on "The Ethics of Resource Allocation" on Saturday, March 10. Discussion will be on such questions as what is quality? for whom? and how can justice be reached in the allocation of resources?

Anne J. Davis, RN, PhD, professor, is faculty lecturer. For further information call Hazel Georgetti or Barbara Mow at x1504.

Geneticist Yuet Wai Kan, MD, has been elected the 27th Annual Faculty Research Lecturer—the highest honor the UCSF faculty can bestow upon one of its own members in recognition of outstanding scientific achievement.

Kan, a geneticist, is professor of medicine, biochemistry and biophysics and heads the Division of Genetics and Molecular Hematology. He also is an investigator in the Howard Hughes Medical Institute. He is known for his research in the study of hemoglobin abnormalities and for his work in fetal diagnosis of sickle cell anemia and thalassemia—another genetic blood ailment that usually affects persons of Mediterranean and Asian descent. Kan's work in detecting these inherited blood disorders *in utero* has earned him recognition as one of the world's most distinguished researchers in the field of genetics.

The first recipient of the UCSF Louis K. Diamond Chair in Hematology two months ago, Kan also has received for his pioneering research the Damashek Award in 1979 from the American Society of Hematology and the Stratton Award from the International Society of Hematology in 1980.

Harold L. Enarson, PhD, senior advisor of the Western Interstate Commission for Higher Education and president emeritus of Ohio State University, is serving as Regents Lecturer in the UCSF School of Medicine during the winter and spring quarters. He will be on campus the week of March 8.

Enarson's fields are public policy and higher education, the effects of the changing economic climate on higher education, and governance issues. He will meet with faculty of the Institute for Health Policy Studies to study the impact of policy shifts on the academic health science center.

Faculty and staff wishing to contact Enarson can reach him at the office of Philip R. Lee, MD, x4921.

Ronald D. Miller, MD, has been appointed chair of the Department of Anesthesia, effective February 15. Miller first came to UCSF as a resident in 1965. A staff anesthesiologist in the US Navy from 1968, he returned to UCSF as an assistant professor of anesthesia and pharmacology in 1970. He became a professor in 1978, and has served as vice chair of the Department of Anesthesia since 1982. Miller also has directed the nerve block clinic since its inception in 1971.

Miller is the first anesthesiologist to receive the Wellcome Foundation William N. Creasy Visiting Professorship in Clinical Pharmacology, for which he will be spending a week at Georgetown University in April. Miller's major research contributions have been in the area of pharmacology concerning neuromuscular blocking agents and the nature of their interactions with other drugs.

Sol Shnider, professor of anesthesia and ob/gyn, has served as acting chair of the department for the last six months.

A public hearing was held on Thursday evening, February 16, to receive testimony on the Draft Environmental Impact Report for the proposed UCSF Vision Research Center. As is the procedure, UCSF asked for verbal and written testimony regarding the DEIR.

Following a brief presentation by Steven Kramer, MD, chair of the Department of Ophthalmology, who spoke on the need for a vision facility at UCSF, two members of the community spoke on their concerns about certain aspects of the project and the DEIR.

Individuals have until 5 p.m. on Monday, March 12, to submit any further written testimony, at which time the campus will respond to all written and verbal testimony and incorporate this into a final EIR. Copies will be available to the public by writing the Chancellor's Office, 145 Irving Street, University of California, SF, CA 94143, or by calling x2911.

In an all-University of California election earlier this month the American Federation of Teachers won the right to be the exclusive representative of some 1900 non-academic senate, instructional employees. Unit 18 is composed primarily of associates, lecturers, visiting lecturers, supervisors of physical education and supervisors of teacher education on the nine campuses. The University Council-AFT received 707 votes. There were 447 votes for no representation, 47 void ballots and 70 were challenged.

The UCSF School of Nursing was listed as the number one graduate program in nursing in the country in the 1983-84 Gourman Report. Second was Case Western Reserve and third, University of Michigan at Ann Arbor.

If you would like to meet Isaac Stern in person and at the same time benefit the Rosalind Russell Medical Research Center for Arthritis, come to the Isaac Stern concert on Sunday, March 25, at 8:30 p.m. at the Louise M. Davies Symphony Hall.

Tickets are $75 ($56.50 of which is tax deductible) and include a post-performance champagne reception on stage to meet the world-famous violinist. The Arthritis Center has obtained 200 excellent seats for the recital. For ticket information, call the Arthritis Center as soon as possible at 666-1141.

A rapid computerized medical image storage and transmission system that speeds patient diagnosis and improves diagnostic information has been installed at Moffitt/Long Hospitals in Room M 381.

UCSF is the first medical center in the country to use the digital teleradiology technology in an intrahospital, clinical environment.

The system stores, on digital disks, film images obtained from conventional x-ray, computed tomography (CT), digital subtraction angiography, ultrasound and magnetic resonance. After the x-ray film is processed, the system converts the x-ray into digital signals and reconstructs the image onto a screen.

The scanning and digitizing of the x-ray takes 0.75 seconds, and the images are ready for immediate display on monitors located in the Intensive Care Unit and the Emergency Room. Another pair of monitors will be installed soon in the Intensive Care Nursery.

Nominations for the 16th annual Kaiser Awards for Excellence in Teaching are due in the School of Medicine Dean's Office, S 224, by Wednesday, February 29.

The Kaiser Awards are open to any member of the School of Medicine faculty who is active in teaching undergraduate medical students and/or housestaff. This year, three awards of $750 each will be presented.

Nominations may be submitted by students, housestaff or faculty and should include a brief description of the nominee's teaching responsibilities, effectiveness of presentation, and ability to stimulate interest and self-education. Supporting letters from students and peers and other appropriate documentation is encouraged.

The Committee to Defend Reproductive Rights of the Coalition for the Medical Rights of Women is sponsoring a one-day conference entitled "Abortion Update: A Conference for Health Care Workers," on Saturday, March 3, in Toland Hall.

The conference will focus on the legal, clinical and social aspects of abortion. Continuing education credit is available. To register call 552-2000.

HONORS & AWARDS

Julius H. Comroe, Jr., director emeritus, CVRI; professor emeritus, physiology: Elected an honorary member of England's Physiological Society, the most prestigious physiological society in the world, at their semi-annual meeting in London in January.

David A. Wood, director emeritus & consultant, CRI: Reappointed by American Joint Committee on Cancer (AJCC) as chair of its Task Force on Colon, Rectum & Anus, and honored by the AJCC at their 25th annual meeting for "25 years of dedicated service."

Howard A. Liddle, associate professor & director, Behavioral Sciences Program, Division of Family & Community Medicine: Appointed to the Commission on Supervision, American Association for Marriage & Family Therapy; appointed to the editorial advisory board of the journal *Family Process.*

George J. Wood, '24 School of Medicine graduate: Named California's 1984 Rural Physician of the Year by the California Medical Association and presented the fifth annual Frederick K.M. Plessner Memorial Award recognizing "the physician who best exemplifies the ethics and practice of a rural country practitioner."

Dorothy S. Huntington, associate clinical professor, psychiatry: Appointed to the Life Course & Prevention Research Review Committee, National Institute of Mental Health, Alcohol, Drug Abuse & Mental Health Administration, US Department of Health & Human Services.

Lawrence Napolitano, fourth-year student, School of Dentistry: One of five dental students in the state to be awarded the F. Gene Dixon Student Leadership Award from the California Dental Service.

Valli T. McDougle, executive assistant to the dean, School of Medicine: Editorial writer for a 1983 six-part series on KCBS Radio entitled, "Domestic Violence: Hurt So Bad," which just won the best station editorial award from the Northern California chapter of the Radio and TV News Directors Association.

IN MEMORIAM

Ronald E. Talcott, associate professor, laboratory medicine. He died in a Bay Bridge car accident, Feb. 6. A member of the faculty since 1980, Talcott was a research scientist in the Northern California Occupational Health Center, Toxicology Laboratory at SFGH.

UCSF researchers at SFGH are beginning a controlled study of interferon treatment for gay men with chronic lymph node enlargement, an AIDS-related disorder.

The condition—lymphadenopathy—may represent an attempt by the body to fight off the agent that causes acquired immune deficiency syndrome, believed by most researchers to be a virus, says Donald I. Abrams, MD, assistant director of the AIDS/Kaposi's Sarcoma Clinic at SFGH, who heads the study.

Lymphadenopathy has been observed in gay men since the AIDS outbreak began in 1979. It is often accompanied by other AIDS symptoms, such as fever, night sweats, extreme fatigue and weight loss. Abrams has followed 200 men with the syndrome since November 1981, five of whom have gone on to develop AIDS, leading Abrams to speculate that, in some people, the immune system eventually becomes fatigued and a full-blown form of the disease sets in.

Abrams hopes to recruit 30 men for the study. Half will receive a low dose of interferon, the other 15 will receive a placebo. Men interested in participating in the study must have had lymph node enlargement for at least six months that has been confirmed as benign by biopsy, and must have some other symptoms of the syndrome. For further information call the SFGH AIDS/KS Clinic at 821-8830.

"Bear's Wares," part of the Millberry Union bookstore, now offers a complete range of Kodak photofinishing services. Kodak picks up film at Millberry every weekday morning with a turnaround on Ektachrome prints of two days. Prints from Kodacolor film take three days. Reprints and enlargements require five to seven working days. For further information call x1078.

Nurses and other health professionals who would like to know more about Therapeutic Touch—the concept of using touch to relieve pain and to heal and comfort—are invited to a symposium on Saturday and Sunday, March 3 and 4.

Cosponsored by UCSF Nursing Education and Research and Nurse Healers Professional Associates, Inc., the symposium will consist of two concurrent Saturday workshops—one for those unfamiliar with Therapeutic Touch, and one for advanced practitioners who want to broaden their knowledge and practical skills—and a joint program for all workshop participants on Sunday.

For further information contact Linda Schill at x3921 or Nursing Education and Research at x2993.
